DETAILED ACTION

Election Acknowledgement

1. Examiner acknowledges the election of Group I of claims 1-9, 11-14, 19-24 drawn to the method; however, upon further consideration of the elected method claims, the following election of species is further requested.

Election of species

2. This application contains claims directed to the following patentably distinct species from the method claims:

Please elect one of the following:

R1 = partial pressure ratio of $\text{TiCl}_4:\text{NH}_3$ of first step

R2 = partial pressure ratio of $\text{TiCl}_4:\text{NH}_3$ of second step

a. (Claim 2) $R1 > R2$

b. (Claim 3) $R1 < R2$

Please elect one of the following:

F1 = first flow rate ratio (flow rate ratio of $\text{TiCl}_4:\text{NH}_3$ of first step)

a. (Claim 8) $F1 < 15$

b. (Claim 9) $16 < F1$

Please elect one of the following:

F1 = first flow rate ratio

F2 = second flow rate ratio

- a. NH3 to TiCl4 ratio; where $2.5 < F1 < 15$; $0.3 < F2 < 10$ (e.g. claims 20-22)
- b. TiCl4 to NH3 ratio; where $2.5 < F1 < 60$; $0.3 < F2 < 10$ (e.g. claim 7)

The species are independent or distinct because the claims to the different species recite the mutually exclusive characteristics via the illustrated inequalities above.

In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, or a single grouping of patentably indistinct species, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1, 6-7, 11-14, 19, 23-24 generic.

There is a search and/or examination burden for the patentably distinct species as set forth above because at least the following reason(s) apply:

- the species or groupings of patentably indistinct species have acquired a separate status in the art due to their recognized divergent subject matter
- the species or groupings of patentably indistinct species require a different field of search (e.g., searching different classes /subclasses or electronic resources, or employing different search strategies or search queries).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or a grouping of patentably indistinct species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species or grouping of patentably indistinct species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species or grouping of patentably indistinct species.

Should applicant traverse on the ground that the species, or groupings of patentably indistinct species from which election is required, are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing them to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Conclusion

1. No claim is allowed.
2. All the pending claims are subject to restriction/election requirement.
